# Important safety instructions

Your projector is designed and tested to meet the latest standards for safety of information technology equipment. However, to ensure safe use of this product, it is important that you follow the instructions mentioned in this manual and marked on the product.

## Safety Instructions

1. **Please read this manual before you operate your projector.** Save it for future reference.

2. **Do not look straight at the projector lens during operation.** The intense light beam may damage your eyes.

3. **Refer servicing to qualified service personnel.**

4. **Always open the lens shutter (if any) or remove the lens cap (if any) when the projector lamp is on.**

5. In some countries, the line voltage is NOT stable. This projector is designed to operate safely within a mains voltage between 100 to 240 volts AC, but could fail if power cuts or surges of  $\pm 10$  volts occur. **In areas where the mains voltage may fluctuate or cut out, it is recommended that you connect your projector through a power stabilizer, surge protector or uninterruptible power supply (UPS).**

6. Do not block the projection lens with any objects when the projector is under operation as this could cause the objects to become heated and deformed or even cause a fire. To temporarily turn off the lamp, press **ECO BLANK** on the projector or remote control.

## Safety Instructions (Continued)

7. The lamp becomes extremely hot during operation. Allow the projector to cool for approximately 45 minutes prior to removing the lamp assembly for replacement.

8. Do not operate lamps beyond the rated lamp life. Excessive operation of lamps beyond the rated life could cause them to break on rare occasions.

9. Never replace the lamp assembly or any electronic components unless the projector is unplugged.

10. Do not place this product on an unstable cart, stand, or table. The product may fall, sustaining serious damage.

11. Do not attempt to disassemble this projector. There are dangerous high voltages inside which may cause death if you should come into contact with live parts. The only user serviceable part is the lamp which has its own removable cover.

Under no circumstances should you ever undo or remove any other covers. Refer servicing only to suitably qualified professional service personnel.

12. When the projector is under operation, you may sense some heated air and odor from its ventilation grill. It is a normal phenomenon and not a product defect.

## Safety Instructions (Continued)

13. Do not place this projector in any of the following environments.
- Space that is poorly ventilated or confined. Allow at least 50 cm clearance from walls and free flow of air around the projector.
  - Locations where temperatures may become excessively high, such as the inside of a car with all windows rolled up.
  - Locations where excessive humidity, dust, or cigarette smoke may contaminate optical components, shorten the projector's life span and darken the image.

- Locations near fire alarms
- Locations with an ambient temperature above 40°C / 104°F
- Locations where the altitudes are higher than 3000 m (10000 feet).

14. Do not block the ventilation holes.
- Do not place this projector on a blanket, bedding or any other soft surface.
  - Do not cover this projector with a cloth or any other item.
  - Do not place inflammables near the projector.

If the ventilation holes are seriously obstructed, overheating inside the projector may result in a fire.

15. Always place the projector on a level, horizontal surface during operation.
- Do not use if tilted at an angle of more than 10 degrees left to right, nor at angle of more than 15 degrees front to back. Using the projector when it is not fully horizontal may cause a malfunction of, or damage to, the lamp.

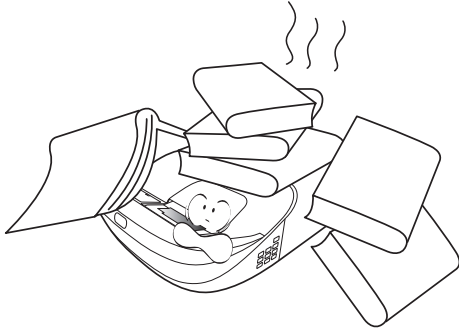

16. Do not stand the projector on end vertically. Doing so may cause the projector to fall over, causing injury or resulting in damage to the projector.

## Safety Instructions (Continued)

17. Do not step on the projector or place any objects upon it. Besides probable physical damage to the projector, doing so may result in accidents and possible injury.

18. Do not place liquids near or on the projector. Liquids spilled into the projector may cause it to fail. If the projector does become wet, disconnect it from the power supply's power outlet and call BenQ to have the projector serviced.

19. This product is capable of displaying inverted images for ceiling mount installation.

Use only BenQ's Ceiling Mount Kit for mounting the projector and ensure it is securely installed.

20. This apparatus must be earthed.

### Ceiling mounting the projector

We want you to have a pleasant experience using your BenQ projector, so we need to bring this safety matter to your attention to prevent possible damage to person and property.

If you intend to mount your projector on the ceiling, we strongly recommend that you use a proper fitting BenQ projector ceiling mount kit and that you ensure it is securely and safely installed.

If you use a non-BenQ brand projector ceiling mount kit, there is a safety risk that the projector may fall from the ceiling due to an improper attachment through the use of the wrong gauge or length screws.

You can purchase a BenQ projector ceiling mount kit from the place you purchased your BenQ projector. BenQ recommends that you also purchase a separate Kensington lock compatible security cable and attach it securely to both the Kensington lock slot on the projector and the base of the ceiling mount bracket. This will perform the secondary role of restraining the projector should its attachment to the mounting bracket become loose.

Hg - Lamp contains mercury. Manage in accordance with local disposal laws. See [www.lamprecycle.org](http://www.lamprecycle.org).

# Introduction

## Projector features

### The projector offers the following features

- **SmartEco™ starts your dynamic power saving**  
The SmartEco™ technology offers a new way of operating the projector lamp system and saves lamp power depending on the content brightness level.
  - **Interactive capability**  
Extends the interactive function with optional PointWrite module.
  - **Corner Fit and Surface Fit**  
Correct each distorted corner and edge to get a perfect rectangular image.
  - **HDMI/MHL compatible**  
You can project the content from your smart devices via HDMI/MHL connection.
  - **Network Control**  
Integrated RJ45 connector for wired network control allowing management of projector status from a computer using a web browser.  
Enable Network Standby mode < 6 W.
  - **Crestron RoomView® and AMX supported**  
The projector supports Crestron eControl, RoomView and AMX allowing you to control and manage equipment from a remote computer via LAN connection.
  - **Less than 0.5W in standby condition**  
Less than 0.5W power consumption under standby mode.
  - **One-key auto-adjustment**  
Pressing **AUTO** on the keypad or remote control to show the best picture quality immediately.
  - **Built-in 10 W x 2 speaker(s)**  
Built-in speaker(s) providing mixed mono audio when an audio input is connected
  - **Quick Cooling, Auto Power Off, Signal Power On, Direct Power On**  
**Quick Cooling** function speeds up the cooling process when turning off the projector. **Auto Power Off** function allows the projector to turn off automatically if no input signal is detected after a set period of time. **Signal Power On** function turns on your projector automatically once detecting the signal input and **Direct Power On** turns your projector when the power is fed.
  - **3D Function supported**  
Various 3D formats make the 3D function more flexible. By presenting the depth of the images, you can wear BenQ 3D glasses to enjoy the 3D movies, videos and sporting events in a more realistic way.
-  • The apparent brightness of the projected image will vary depending on the ambient lighting conditions, selected input signal contrast/brightness settings, and is directly proportional to projection distance.
- The lamp brightness will decline over time and may vary within the lamp manufacturers specifications. This is normal and expected behavior.

# Shipping contents

Carefully unpack and verify that you have all of the items shown below. If any of these items are missing, please contact your place of purchase.

## Standard accessories

 The supplied accessories will be suitable for your region, and may differ from those illustrated.

\*Only supplied in some specific regions. Please consult your dealer for detailed information.

Projector with the projector mounting plate

Power cord

VGA cable

Quick start guide

User manual CD

Warranty card\*

Remote control with batteries

Wall mount kit

## Optional accessories

1. Spare lamp kit
2. 3D glasses
3. PointWrite kit

# Projector exterior view

## Front/upper side

## Rear/lower side

1. Lamp cover
2. Vent (heated air exhaust)
3. Speaker grill
4. PointWrite dummy cover (Optional PointWrite kit)
5. Front IR remote sensor
6. Projection lens and Mirror
7. Adjuster foot
8. Speaker
9. External control panel  
(See ["Controls and functions"](#) on page 10 for details.)
10. Focus ring
11. Vent (cool air intake)
12. USB Type-A port (for USB flash drive/USB wireless dongle)
13. HDMI/MHL-input port (for HDMI dongle)
14. AC power jack
15. USB Type A port (Power for Touch kit)
16. PointWrite port (PointWrite kit is required)
17. HDMI-input port
18. Video input jack
19. S-Video input jack
20. Audio (L/R) input jacks
21. Audio input jacks  
Audio output jack
22. RGB (PC)/Component Video (YPbPr/ YCbCr) signal input jacks
23. RGB signal output jack
24. RS232 control port
25. RJ45 LAN input jack
26. USB Mini-B port
27. Kensington anti-theft lock slot
28. Projector mounting plate

# Controls and functions

## Projector

1. **Focus ring**  
Adjusts the focus of the projected image.
2. **POWER indicator light**  
Lights up or flashes when the projector is under operation.
3. **TEMPerature warning light**  
Lights up red if the projector's temperature becomes too high.
4. **LAMP indicator light**  
Indicates the status of the lamp. Lights up or flashes when the lamp has developed a problem.
5. **MENU/EXIT**  
Turns on the On-Screen Display (OSD) menu. Goes back to previous OSD menu, exits and saves menu settings.
6. **Keystone/Arrow keys ( ▽ / ▲ Up, ▢ / ▼ Down)**  
Manually corrects distorted images resulting from an angled projection.
7. **◀ Left/ 🔊**  
Decreases the projector volume.
8. **MODE/ENTER**  
Selects an available picture setup mode. Activates the selected On-Screen Display (OSD) menu item.
9. **ECO BLANK**  
Used to hide the screen picture.
10. **⏻ POWER**  
Toggles the projector between standby mode and on.
11. **AUTO**  
Automatically determines the best picture timings for the displayed image.
12. **▶ Right/ 🔊**  
Increases the projector volume. When the On-Screen Display (OSD) menu is activated, the #6, #7 and #12 keys are used as directional arrows to select the desired menu items and to make adjustments.
13. **SOURCE**  
Displays the source selection bar.

# Remote control

1. **ON/OFF**  
Toggles the projector between standby mode and on.
2. **Source selection buttons (COMPUTER 1, COMPUTER 2, VIDEO, S-VIDEO, HDMI, NETWORK)**  
Selects an input source for display.
3. **Keystone/Arrow keys ( ▽ / ▲ Up, ▴ / ▼ Down )**  
Manually corrects distorted images resulting from an angled projection.
4. **MENU/EXIT**  
Turns on the On-Screen Display (OSD) menu. Goes back to previous OSD menu, exits and saves menu settings.
5. **◀ Left/ ▶ Right**  
Decreases the projector volume.
6. **MODE/ENTER**  
Selects an available picture setup mode. Activates the selected On-Screen Display (OSD) menu item.
7. **ECO BLANK**  
Used to hide the screen picture.
8. **LASER**  
Emits visible laser pointer light for presentation purposes.
9. **MHL control buttons ( ◀◀ Previous, ▶/|| Play/Pause, ▶▶ Next, ◀◀ Rewind, ■ Stop, ▶▶ Fast-forward )**  
Goes to the previous file/Plays/Pauses/  
Goes to the next file/Rewinds/Stops/Fast-forwards during media playback.  
Only available when controlling your smart device in MHL mode.
10. **ZOOM+/ZOOM-**  
Magnifies or reduces the projected picture size.
11. **PAGE+/PAGE-**  
Operate your display software program (on a connected PC) which responds to page up/down commands (like Microsoft PowerPoint).

## 12. FREEZE

Freezes the projected image.

## 13. NETWORK SETTING

Displays the **Network Settings** OSD menu.

## 14. QUICK INSTALL

Quickly selects several functions to adjust the projected image and displays the test pattern.

## 15. AUTO

Automatically determines the best picture timings for the displayed image.

## 16. ► Right/ (Speaker icon)

Increases the projector volume.

When the On-Screen Display (OSD) menu is activated, the #3, #5, and #16 keys are used as directional arrows to select the desired menu items and to make adjustments.

## 17. SOURCE

Displays the source selection bar.

## 18. MIC/VOL+/MIC/VOL- (No function.)

## 19. MUTE

Toggles projector audio between on and off.

## 20. ASPECT

Selects the display aspect ratio.

## 21. SMART ECO

Displays the **Lamp Mode** menu for selecting a suitable lamp operating mode.

## 22. Numeric buttons

Enters numbers in network settings.

## Operating the LASER pointer

The Laser Pointer is a presentation aid for professionals. It emits red colored light when you press it.

The laser beam is visible. It is necessary to press and hold **LASER** for continuous output.

Avoid Exposure  
Laser radiation is emitted from this aperture

⚠ Do not look into the laser light window or shine the laser light beam on yourself or others. See the warning messages on the back of the remote control prior to using it.

The laser pointer is not a toy. Parents should be mindful of the dangers of laser energy and keep this remote control out of the reach of children.

## Controlling your smart device with the remote control

When the projector projects the content from your MHL compatible smart device, you can use the remote control to control your smart device.

To enter the MHL mode, press and hold **AUTO** for 3 seconds. The following buttons are available for controlling your smart device: **Arrow keys** (◁ / ▲ Up, ▷ / ▼ Down, ◀ Left, ▶ Right), **MENU/EXIT**, **MODE/ENTER**, #0-#9, **MHL control buttons**.

To leave the MHL mode, press and hold **AUTO** for 3 seconds.

☞ When the projector is under MHL mode, the keypad on the projector should be with the same definition of the keys on the remote control.

## Remote control effective range

The remote control must be held at an angle within 30 degrees perpendicular to the projector's IR remote control sensor(s) to function correctly. The distance between the remote control and the sensor(s) should not exceed 8 meters (~ 26 feet).

Make sure that there are no obstacles between the remote control and the IR sensor(s) on the projector that might obstruct the infra-red beam.

- Operating the projector from the front

## Replacing the remote control batteries

1. To open the battery cover, turn the remote control over to view its back, push on the finger grip on the cover and slide it up in the direction of the arrow as illustrated. The cover will slide off.
2. Remove any existing batteries (if necessary) and install two AAA batteries observing the battery polarities as indicated in the base of the battery compartment. Positive (+) goes to positive and negative (-) goes to negative.
3. Refit the cover by aligning it with the base and sliding it back down into position. Stop when it clicks into place.

- ⚠ • Avoid leaving the remote control and batteries in an excessive heat or humid environment like the kitchen, bathroom, sauna, sunroom or in a closed car.
- Replace only with the same or equivalent type recommended by the battery manufacturer.
- Dispose of the used batteries according to the manufacturer's instructions and local environment regulations for your region.
- Never throw the batteries into a fire. There may be danger of an explosion.
- If the batteries are dead or if you will not be using the remote control for an extended period of time, remove the batteries to avoid damage to the remote control from possible battery leakage.

# Positioning your projector

## Using the quick install

The projector provides a hot key to set **Projector Installation**, **Test Pattern**, and **2D Keystone** quickly.

Press **QUICK INSTALL** on the remote control and press ▲/▼ to select from the below items:

- **Projector Installation.** See "[Positioning your projector](#)" on page 14 for details.
- **Test Pattern.** See "[Using the test pattern](#)" on page 38 for details.
- **2D Keystone.** See "[Correcting keystone](#)" on page 22 for details.

### 1. Choosing a location

Your projector is designed to be installed in one of the following possible installation locations:

### 2. Using the test pattern

### 3. Correcting the image

- 2D Keystone correction

- Corner fit correction

- Surface fit correction

Set up your screen via the **QUICK INSTALL** hotkey on the remote control. You can also go to the **SYSTEM SETUP: Basic > Projector Installation** menu after turning on the projector. See "[Using the menus](#)" on page 25 on how to use the OSD menu.

Your room layout or personal preference will dictate which installation location you select. Take into consideration the size and position of your screen, the location of a suitable power outlet, as well as the location and distance between the projector and the rest of your equipment.

## Obtaining a preferred projected image size

### Projection dimensions

- Installation distance **D** is measured from the projector rear side to the wall surface, which is also indicated on the scale of the wall mount.
- Projection distance **a** is measured from the projector rear side to the projection surface.
- Vertical offset **V** is measured from the bottom edge of the wall plate to the top edge of screen.

## Image adjustment area

## MX882UST

The screen aspect ratio is 4:3 and the projected picture is in a 4:3 aspect ratio

Screen size			Min Ceiling height	Vertical offset	Installation distance (D)		
Diagonal (M)	Height (h)	Weight (W)	H <sup>a</sup>	V	X <sup>b</sup> =0 mm (D=a)	X <sup>c</sup> =30 mm (D=a+30 mm)	
Inch	mm	(mm)	(mm)	(mm)	(mm)	(mm)	
73	1854	1113	1483	2401	238	88	118
78	1981	1189	1585	2490	252	118	148
83	2108	1265	1687	2580	265	147	177
88	2235	1341	1788	2670	279	177	207
93	2362	1417	1890	2760	292	207	237
98	2489	1494	1991	2849	306	236	266
100	2540	1524	2032	2885	311	248	278
103	2616	1570	2093	2939	319	266	296
108	2743	1646	2195	3029	333	296	326
110	2794	1676	2235	3065	338	308	338

- base on an image 762 mm from the floor, if the image is lower, the min ceiling height is reduced by the measurement.
- Assume the thickness of projection screen(X) is 0 mm.
- Assume the thickness of projection screen(X) is 30 mm.

## MW883UST

The screen aspect ratio is 16:10 and the projected picture is in a 16:10 aspect ratio

Screen size			Min Ceiling height	Vertical offset	Installation distance (D)		
Diagonal (M)	Height (h)	Weight (W)	H <sup>a</sup>	V	X <sup>b</sup> =0 mm (D=a)	X <sup>c</sup> =30 mm (D=a+30 mm)	
Inch	mm	(mm)	(mm)	(mm)	(mm)	(mm)	
86.5	2197	1164	1863	2430	216	88	118
87	2210	1171	1874	2438	217	91	121
90	2286	1212	1939	2485	223	106	136
95	2413	1279	2046	2562	233	131	161
100	2540	1346	2154	2639	243	156	186
105	2667	1414	2262	2717	253	181	211
110	2794	1481	2369	2794	263	206	236
115	2921	1548	2477	2872	273	231	261
120	3048	1615	2585	2949	284	256	286
125	3175	1683	2692	3026	294	281	311
130	3302	1750	2800	3104	304	306	336

- base on an image 762 mm from the floor, if the image is lower, the min ceiling height is reduced by the measurement.
- Assume the thickness of projection screen(X) is 0 mm.
- Assume the thickness of projection screen(X) is 30 mm.

All measurements are approximate and may vary from the actual sizes.

BenQ recommends that if you intend to permanently install the projector, you should physically test the projection size and distance using the actual projector in situ before you permanently install it, so as to make allowance for this projector's optical characteristics. This will help you determine the exact mounting position so that it best suits your installation location.

# Connection

When connecting a signal source to the projector, be sure to:

1. Turn all equipment off before making any connections.
2. Use the correct signal cables for each source.
3. Ensure the cables are firmly inserted.

- ☞ In the connections shown below, some cables may not be included with the projector (see "Shipping contents" on page 8). They are commercially available from electronics stores.
- The connection illustrations below are for reference only. The rear connecting jacks available on the projector vary with each projector model.

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. VGA cable</li> <li>2. VGA to DVI-A cable</li> <li>3. USB cable</li> <li>4. Component Video to VGA (D-Sub) adapter cable</li> <li>5. S-Video cable</li> <li>6. Video cable</li> <li>7. Audio cable</li> </ol> | <ol style="list-style-type: none"> <li>8. Audio L/R cable</li> <li>9. USB cable (A to mini B type) connect to Touch Module</li> <li>10. HDMI cable</li> <li>11. USB flash drive</li> <li>12. USB wireless dongle</li> <li>13. HDMI wireless dongle</li> </ol> |
|--|---|

- 
 • Many notebooks do not turn on their external video ports when connected to a projector. Usually a key combo like FN + F3 or CRT/LCD key turns the external display on/off. Locate a function key labeled CRT/LCD or a function key with a monitor symbol on the notebook. Press FN and the labeled function key simultaneously. Refer to your notebook's documentation to find your notebook's key combination.
- The D-Sub output only works when an appropriate D-Sub input is made to the **COMPUTER I** jack.
- If you wish to use this connection method when the projector is in standby mode, make sure the **Monitor Out** function is turned on in the **SYSTEM SETUP: Advanced** menu. See "[Standby Settings](#)" on page 51 for details.

## Connecting video source devices

You need only connect the projector to a video source device using just one of the connecting methods, however each provides a different level of video quality. The method you choose will most likely depend upon the availability of matching terminals on both the projector and the video source device as described below:

Terminal name	Terminal appearance	Picture quality
<b>HDMI/MHL</b>		 Best
<b>Component Video</b>		 Better
<b>S-Video</b>		 Good
<b>Video</b>		 Normal

### Connecting audio

The projector has built-in mono speaker(s) which are designed to provide basic audio functionality accompanying data presentations for business purposes only. They are not designed for, nor intended for stereo audio reproduction use as might be expected in home theater or home cinema applications. Any stereo audio input (if provided), is mixed into a common mono audio output through the projector speaker(s).

The built-in speaker(s) will be muted when the **AUDIO OUT** jack is connected.

- 
 • The projector is only capable of playing mixed mono audio, even if a stereo audio input is connected. See "[Connecting audio](#)" on page 19 for details.

- If the selected video image is not displayed after the projector is turned on and the correct video source has been selected, check that the video source device is turned on and operating correctly. Also check that the signal cables have been connected correctly.

## Connecting smart devices

The projector can project the content directly from a MHL compatible smart device. Using a MHL wireless dongle, you can connect your smart devices to the projector and then enjoy your content on the big screen.

 Some smart devices may not be compatible to the cable that you use. Please consult the manufacturer of your smart device for detailed information.

1. Take a HDMI wireless dongle or a USB wireless dongle and connect it the MHL input connector on the projector.
2. Switch to the HDMI/MHL input source. To switch input signal, see "[Switching input signal](#)" on page 28 for details.

# Operation

## Starting up the projector

1. Plug the power cord into the projector and into a power outlet. Turn on the power outlet switch (where fitted). Check that the **POWER indicator light** on the projector lights orange after power has been applied.

⚠ Please use the original accessories (e.g. power cord) only with the device to avoid possible dangers such as electric shock and fire.

2. Press **POWER** or **ON** to start the projector. As soon as the lamp lights up, a "Power On Tone" will be heard. The **POWER indicator light** flashes green and stays green when the projector is on.

The start up procedure takes about 30 seconds. In the later stage of start up, a startup logo is projected.

(If necessary) Rotate the focus ring to adjust the image clearness.

To turn off the ring tone, see "[Turning off the Power On/Off Ring Tone](#)" on page 38 for details.

The projector is able to turn on automatically when detecting a VGA signal or a HDMI signal with 5V power. To activate this function, set **On** in the **SYSTEM SETUP: Basic > Operation Settings > Signal Power On** menu.

☞ If the projector is still hot from previous activity, it will run the cooling fan for approximately 90 seconds before energizing the lamp.

3. If the projector is activated for the first time, select your OSD language following the on-screen instructions.
4. If you are prompted for a password, press the arrow keys to enter a six-digit password. See "[Utilizing the password function](#)" on page 26 for details.
5. Switch all of the connected equipment on.
6. The projector will start to search for input signals. The current input signal being scanned displays in the upper left corner of the screen. If the projector doesn't detect a valid signal, the message "No Signal" will continue displaying until an input signal is found.

PLEASE SELECT LANGUAGE		
English	한국어	Hrvatski
Français	Svenska	Română
Deutsch	Nederlands	Norsk
Italiano	Türkçe	Dansk
Español	Čeština	Български
Русский	Português	suomi
繁體中文	ไทย	Indonesian
简体中文	Polski	Ελληνικά
日本語	Magyar	العربية
हि न दी	Tiếng Việt	

Press Enter to Confirm, Exit to leave

You can also press **SOURCE** on the projector or remote control to select your desired input signal. See "[Switching input signal](#)" on page 28 for details.

☞ If the frequency/resolution of the input signal exceeds the projector's operating range, you will see the message "Out of Range" displayed on the background screen. Please change to an input signal which is compatible with the projector's resolution or set the input signal to a lower setting. See "[Timing chart](#)" on page 63 for details.

- If no signal is detected for 3 minutes, the projector automatically enters ECO BLANK mode.

# Adjusting the projected image

## Auto-adjusting the image

In some cases, you may need to optimize the picture quality. To do this, press **AUTO** on the projector or remote control. Within 3 seconds, the built-in Intelligent Auto Adjustment function will re-adjust the values of Frequency and Clock to provide the best picture quality.

The current source information will be displayed in the corner of the screen for 3 seconds.

 This function is only available when PC signal (analog RGB) is selected.

## Fine-tuning the image clarity

Sharpen the image by rotating the focus ring.

## Correcting keystone

Keystoning refers to the situation where the projected image is noticeably wider at either the top or bottom. It occurs when the projector is not perpendicular to the screen.

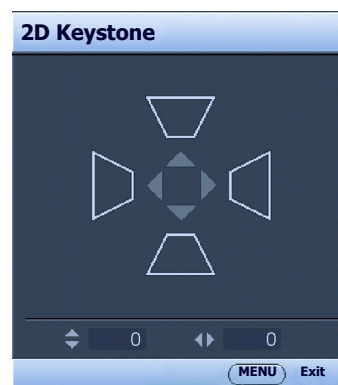

To correct this, you will need to manually correct it following these steps.

1. Do one of the following steps to display the keystone correction page.

- Press  $\triangle$  /  $\nabla$  on the projector or remote control.
- Press **QUICK INSTALL** on the remote control. Press  $\blacktriangledown$  to highlight **2D Keystone** and press **MODE/ENTER**.
- Press **MENU/EXIT** and then press  $\blacktriangleleft$  /  $\blacktriangleright$  until the **DISPLAY** menu is highlighted. Press  $\blacktriangledown$  to highlight **2D Keystone** and press **MODE/ENTER**.

2. After the **2D Keystone** correction page displays. Press  $\triangle$  to correct keystone at the top of the image.

Press  $\nabla$  to correct keystone at the bottom of the image. Press  $\square$  on the

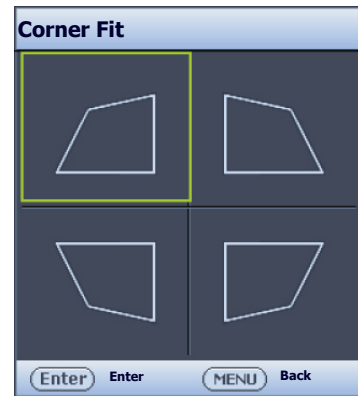

projector to correct keystone at the right side of the image. Press ◀ on the projector to correct keystone at the left side of the image.

## Adjusting Corner Fit

Manually adjust four corners of the image by setting the horizontal and vertical values.

1. Press **MENU/EXIT** and then press ◀/▶ until the **DISPLAY** menu is highlighted.
2. Press ▼ to highlight **Corner Fit** and press **MODE/ENTER**. The **Corner Fit** correction page displays.
3. Press ▲/▼/◀/▶ to select one corner and press **MODE/ENTER**.

4. Press ▲/▼ to adjust vertical values.
5. Press ◀/▶ to adjust horizontal values.

## Corner Fit and 2D Keystone Adjustment Notice

The corner fit function is closely related to the 2D keystone function as both make adjustments to correct picture distortion. Therefore, when correcting picture distortion, both corner fit and 2D keystone functions should be used in conjunction to achieve the best picture shape.

To achieve the best picture shape:

- When installing the projector, align the projector to the screen so they are as perpendicular to each other as possible in order to minimize picture distortion.
- When making corner fit adjustments, if the desired effect cannot be achieved, adjust the 2D keystone value and try again.
- When making 2D keystone adjustments, if the desired effect cannot be achieved, adjust the corner fit value and try again.

## Adjusting surface fit

Manually correct geographic distortion by Surface Fit calibration function.

1. Press **MENU/EXIT** and then press ◀/▶ until the **DISPLAY** menu is highlighted.
2. Press ▼ to highlight **Surface Fit** and press **MODE/ENTER**. The **Surface Fit** correction page displays.
3. Press ▲/▼ to select **Horizontal** and press **MODE/ENTER**.
4. Select the direction you want to adjust and press **MODE/ENTER**.
5. Press ◀/▶ to adjust the left or/and right side convex or concave. Single side adjustment is for distortion only.
6. For both sides of the horizontal surface fit, use ▲/▼ to adjust the center of the curve because it is not always at the center.

To continue with the vertical surface fit adjustment,

1. Press **MENU/EXIT** to go back to the surface fit page.
2. Press ▲/▼ to select **Vertical** and press **MODE/ENTER**.
3. Select the direction you want to adjust and press **MODE/ENTER**.
4. Press ▲/▼ to adjust the top or/and bottom side convex or concave. Single side adjustment is for distortion only.
5. For both sides of the vertical surface fit, use ◀/▶ to adjust the center of the curve because it is not always at the center.

# Using the menus

The projector is equipped with On-Screen Display (OSD) menus for making various adjustments and settings.

The OSD screenshots below are for reference only, and may differ from the actual design.

Below is the overview of the OSD menu.

The following example describes how to set the OSD language.

1. Press **MENU/EXIT** on the projector or remote control to turn the OSD menu on.
3. Press **▼** to highlight **Language** and press **MODE/ENTER**.

2. Use **◀/▶** to highlight the **SYSTEM SETUP: Basic** menu.
4. Press **▲/▼/◀/▶** to select a preferred language.
5. Press **MENU/EXIT** on the projector or remote control to leave and save the settings.

# Securing the projector

## Using a security cable lock

The projector has to be installed in a safe place to prevent theft. Otherwise, purchase a lock, such as the Kensington lock, to secure the projector. You can locate a Kensington lock slot on the rear side of the projector. See item 27 on page 9 for details.

A Kensington security cable lock is usually a combination of key(s) and the lock. Refer to the lock's documentation for finding out how to use it.

## Utilizing the password function

For security purposes and to help prevent unauthorized use, the projector includes an option for setting up password security. The password can be set through the On-Screen Display (OSD) menu.

 **WARNING:** You will be inconvenienced if you activate the password functionality and subsequently forget the password. Print out this manual (if necessary) and write the password you used in this manual, and keep the manual in a safe place for later recall.

### Setting a password

 Once a password has been set and the power on lock is activated, the projector cannot be used unless the correct password is entered every time the projector is started.

1. Open the OSD menu and go to the **SYSTEM SETUP: Advanced > Security Settings** menu. Press **MODE/ENTER**. The **Security Settings** page displays.
2. Highlight **Change Security Settings** and press **MODE/ENTER**.
3. As pictured to the right, the four arrow keys (**▲**, **▶**, **▼**, **◀**) respectively represent 4 digits (1, 2, 3, 4). According to the password you desire to set, press the arrow keys to enter six digits for the password.

 Do not press the numeric buttons when asked to enter the password.

4. Confirm the new password by re-entering the new password.  
Once the password is set, the OSD menu returns to the **Security Settings** page.
5. To activate the **Power On Lock** function, press **▲/▼** to highlight **Power On Lock** and press **◀/▶** to select **On**.
6. To activate the **Web Control Lock** function, press **▲/▼** to highlight **Web Control Lock** and press **◀/▶** to select **On**. When the **Web Control Lock** function is activated, you have to enter the correct password to change projector settings via the Projector Network Display System.

 **IMPORTANT:** The digits being input will display as asterisks on-screen. Write your selected password down here in this manual in advance or right after the password is entered so that it is available to you should you ever forget it.

Password: \_\_\_\_\_

Keep this manual in a safe place.

7. To leave the OSD menu, press **MENU/EXIT**.

## If you forget the password

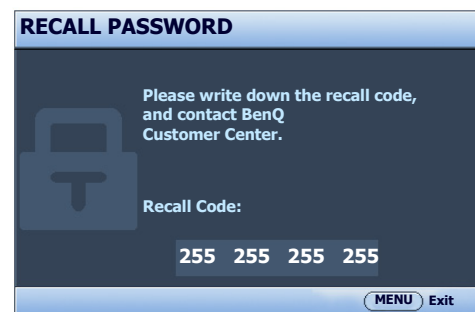

If the password function is activated, you will be asked to enter the six-digit password every time you turn on the projector. If you enter the wrong password, the password error message as pictured to the right displays lasting for 3 seconds, and the **INPUT PASSWORD** message follows. You can retry by entering another six-digit password, or if you did not record the password in this manual, and you absolutely do not remember it, you can use the password recall procedure. See "[Entering the password recall procedure](#)" on page 27 for details.

If you enter an incorrect password 5 times in succession, the projector will automatically shut down in a short time.

## Entering the password recall procedure

1. Press and hold **AUTO** on the projector or remote control for 3 seconds. The projector will display a coded number on the screen.
2. Write down the number and turn off your projector.
3. Seek help from the local BenQ service center to decode the number. You may be required to provide proof of purchase documentation to verify that you are an authorized user of the projector.

## Changing the password

1. Open the OSD menu and go to the **SYSTEM SETUP: Advanced > Security Settings > Change Password** menu.
2. Press **MODE/ENTER**. The message "**INPUT CURRENT PASSWORD**" appears.
3. Enter the old password.
  - i. If the password is correct, another message "**INPUT NEW PASSWORD**" displays.
  - ii. If the password is incorrect, the password error message displays lasting for three seconds, and the message "**INPUT CURRENT PASSWORD**" displays for your retry. You can press **MENU/EXIT** to cancel the change or try another password.
4. Enter a new password.

 **IMPORTANT:** The digits being input will display as asterisks on-screen. Write your selected password down here in this manual in advance or right after the password is entered so that it is available to you should you ever forget it.

Password: \_\_\_\_\_

Keep this manual in a safe place.

5. Confirm the new password by re-entering the new password.
6. You have successfully assigned a new password to the projector. Remember to enter the new password next time the projector is started.
7. To leave the OSD menu, press **MENU/EXIT**.

## Disabling the password function

To disable password protection, go back to the **SYSTEM SETUP: Advanced > Security Settings > Change Security Settings** menu after opening the OSD menu system. Press **MODE/ENTER**. The message **"INPUT PASSWORD"** displays. Enter the current password.

- i. If the password is correct, the OSD menu returns to the **Security Settings** page.  
Press **▼** to highlight **Power On Lock** and press **◀/▶** to select **Off**. You will not have to enter the password next time when turning on the projector.  
Press **▼** to highlight **Web Control Lock** and press **◀/▶** to select **Off**. Now the **Web Control Lock** is released and projector settings can be changed via the Projector Network Display System.
- ii. If the password is incorrect, the password error message displays lasting for three seconds, and the message **"INPUT PASSWORD"** displays for your retry. You can press **MENU/EXIT** to cancel the change or try another password.

 Though the password function is disabled, you need to keep the old password in hand should you ever need to re-activate the password function by entering the old password.

## Switching input signal

The projector can be connected to multiple devices at the same time. However, it can only display one full screen at a time. When starting up, the projector automatically searches for the available signals.

Be sure the **Quick Auto Search** function in the **SOURCE** menu is **On** if you want the projector to automatically search for the signals.

To select the source:

1. Press **SOURCE** on the projector or remote control. A source selection bar displays.
2. Press **▲/▼** until your desired signal is selected and press **MODE/ENTER**.

Once detected, the selected source information will display at the corner of the screen for seconds. If there is multiple equipment connected to the projector, repeat steps 1-2 to search for another signal.

-  • The brightness level of the projected image will change accordingly when you switch between different input signals. Data (graphic) "PC" presentations using mostly static images are generally brighter than "Video" using mostly moving images (movies).
- The native display resolution of this projector is in a 4:3 (MX882UST)/16:10 (MW883UST) aspect ratio. For best display picture results, you should select and use an input signal which outputs at this resolution. Any other resolutions will be scaled by the projector depending upon the "aspect ratio" setting, which may cause some image distortion or loss of picture clarity. See ["Selecting the aspect ratio" on page 29](#) for details.
  - Firewall in the PC must be switched off to allow USB Display to work.

## Changing Color Space

In the unlikely event that you connect the projector to a DVD player via the projector's **HDMI/MHL or HDMI** input and the projected picture displays wrong colors, please change the color space to **YUV**.

To do this:

1. Press **MENU/EXIT** and then press **◀/▶** until the **SOURCE** menu is highlighted.
2. Press **▼** to highlight **Color Space Conversion** and press **◀/▶** to select a suitable color space.

 This function is only available when the HDMI/HML or HDMI input port is in use.

## Magnifying and searching for details

If you need to find the details on the projected picture, magnify the picture. Use the direction arrow keys for navigating the picture.

- Using the remote control
  1. Press **ZOOM+/ZOOM-** or **Digital Zoom+/Digital Zoom-** to display the Zoom bar. Press **ZOOM+** or **Digital Zoom+** to magnify the center of the picture. Press the key repeatedly until the picture size is suitable for your need.
  2. Use the directional arrows (**▲, ▼, ◀, ▶**) on the projector or remote control to navigate the picture.
  3. To restore the picture to its original size, press **AUTO**. You can also press **ZOOM-** or **Digital Zoom-**. When the key is pressed again, the picture is further reduced until it is restored to the original size.
- Using the OSD menu
  1. Press **MENU/EXIT** and then press **◀/▶** until the **DISPLAY** menu is highlighted.
  2. Press **▼** to highlight **Digital Zoom** and press **MODE/ENTER**. The Zoom bar displays.
  3. Press **▲** repeatedly to magnify the picture to a desired size.
  4. To navigate the picture, press **MODE/ENTER** to switch to the panning mode and press the directional arrows (**▲, ▼, ◀, ▶**) on the projector or remote control to navigate the picture.
  5. To reduce size of the picture, press **MODE/ENTER** to switch back to the zoom in/out function, and press **AUTO** to restore the picture to its original size. You can also press **▼** repeatedly until it is restored to the original size.

 The picture can only be navigated after it is magnified. You can further magnify the picture while searching for details.

## Selecting the aspect ratio

The “aspect ratio” is the ratio of the image width to the image height. Most analog TV and some computers are in 4:3 ratio, and digital TV and DVDs are usually in 16:9 ratio.

With the advent of digital signal processing, digital display devices like this projector can dynamically stretch and scale the image output to a different aspect than that of the image input signal.

To change the projected picture ratio (no matter what aspect the source is):

- Using the remote control
  1. Press **ASPECT** to show the current setting.

2. Press **ASPECT** repeatedly to select an aspect ratio to suit the format of the video signal and your display requirements.
- Using the OSD menu
  1. Press **MENU/EXIT** and then press ◀/▶ until the **DISPLAY** menu is highlighted.
  2. Press ▼ to highlight **Aspect Ratio**.
  3. Press ◀/▶ to select an aspect ratio to suit the format of the video signal and your display requirements.

## About the aspect ratio

 In the pictures below, the black portions are inactive areas and the white portions are active areas.

- OSD menus can be displayed on those unused black areas.

1. **Auto:** Scales an image proportionally to fit the projector's native resolution in its horizontal or vertical width. This is suitable for the incoming image which is neither in 4:3 nor 16:9 and you want to make most use of the screen without altering the image's aspect ratio.

2. **Real:** The image is projected as its original resolution, and resized to fit within the display area. For input signals with lower resolutions, the projected image will display smaller than if resized to full screen. You could adjust the zoom setting or move the projector towards the screen to increase the image size if necessary. You may also need to refocus the projector after making these adjustments.

3. **4:3:** Scales an image so that it is displayed in the center of the screen with a 4:3 aspect ratio. This is most suitable for 4:3 images like some computer monitors, standard definition TV and 4:3 aspect DVD movies, as it displays them without aspect alteration.

4. **16:9:** Scales an image so that it is displayed in the center of the screen with a 16:9 aspect ratio. This is most suitable for images which are already in a 16:9 aspect, like high definition TV, as it displays them without aspect alteration.

5. **16:10:** Scales an image so that it is displayed in the center of the screen with a 16:10 aspect ratio. This is most suitable for images which are already in a 16:10 aspect, as it displays them without aspect alteration.

# Optimizing the image

## Using Wall Color

In the situation where you are projecting onto a colored surface such as a painted wall which may not be white, the Wall Color feature can help correct the projected picture's colors to prevent possible color difference between the source and projected pictures.

To use this function, go to the **DISPLAY > Wall Color** menu and press ◀/▶ to select a color which is closest to the color of the projection surface. There are several precalibrated colors to choose from: **Light Yellow, Pink, Light Green, Blue,** and **Blackboard**.

## Selecting a picture mode

The projector is preset with several predefined picture modes so that you can choose one to suit your operating environment and input signal picture type.

To select an operation mode that suits your need, you can follow one of the following steps.

- Press **MODE/ENTER** on the projector or remote control repeatedly until your desired mode is selected.
- Go to the **PICTURE > Picture Mode** menu and press ◀/▶ to select a desired mode.
  1. **Bright mode:** Maximizes the brightness of the projected image. This mode is suitable for environments where extra-high brightness is required, such as using the projector in well lit rooms.
  2. **Presentation mode:** Is designed for presentations. The brightness is emphasized in this mode to match PC and notebook coloring.
  3. **sRGB mode:** Maximizes the purity of RGB colors to provide true-to-life images regardless of brightness setting. It is most suitable for viewing photos taken with an sRGB compatible and properly calibrated camera, and for viewing PC graphic and drawing applications such as AutoCAD.
  4. **Cinema mode:** Is appropriate for playing colorful movies, video clips from digital cameras or DVs through the PC input for best viewing in a blackened (little light) environment.
  5. **3D mode:** Is appropriate for playing 3D images and 3D video clips.
  6. **User 1/User 2 mode:** Recalls the settings customized based on the current available picture modes. See "[Setting the User 1/User 2 mode](#)" on page 32 for details.

### Setting the User 1/User 2 mode

There are two user-definable modes if the current available picture modes are not suitable for your need. You can use one of the picture modes (except the **User 1/2**) as a starting point and customize the settings.

1. Press **MENU/EXIT** to open the On-Screen Display (OSD) menu.
2. Go to the **PICTURE > Picture Mode** menu.
3. Press ◀/▶ to select **User 1** or **User 2**.
4. Press ▼ to highlight **Reference Mode**.

 This function is only available when **User 1** or **User 2** mode is selected up in the **Picture Mode** sub-menu item.

5. Press ◀/▶ to select a picture mode that is closest to your need.

- Press ▼ to select a menu item to be changed and adjust the value with ◀/▶ . See "Fine-tuning the image quality in user modes" below for details.

## Fine-tuning the image quality in user modes

According to the detected signal type and selected picture mode, some of the below functions may not be available. Based on your needs, you can make adjustments to these functions by highlighting them and pressing ◀/▶ on the projector or remote control.

### Adjusting **Brightness**

The higher the value, the brighter the image. And the lower the setting, the darker the image. Adjust this control so the black areas of the image appear just as black and that detail in the dark areas is visible.

### Adjusting **Contrast**

The higher the value, the greater the contrast. Use this to set the peak white level after you have previously adjusted the Brightness setting to suit your selected input and viewing environment.

### Adjusting **Color**

Lower setting produces less saturated colors. If the setting is too high, colors on the image will be overpowering, which makes the image unrealistic.

### Adjusting **Tint**

The higher the value, the more reddish the picture becomes. The lower the value, the more greenish the picture becomes.

### Adjusting **Sharpness**

The higher the value, the sharper the picture becomes. The lower the value, the softer the picture becomes.

### Adjusting **Brilliant Color**

This feature utilizes a new color-processing algorithm and system level enhancements to enable higher brightness while providing truer, more vibrant colors in picture. It enables a greater than 50% brightness increase in mid-tone images, which are common in video and natural scenes, so the projector reproduces images in realistic and true colors. If you prefer images with that quality, select **On**. If you don't need it, select **Off**.

When **Off** is selected, the **Color Temperature** function is not available.

### Selecting a **color temperature**

The options available for color temperature\* settings vary according to the signal type selected.

- Cool:** Makes images appear bluish white.
- Normal:** Maintains normal colorings for white.
- Warm:** Makes images appear reddish white.

#### \*About color temperatures:

There are many different shades that are considered to be "white" for various purposes. One of the common methods of representing white color is known as the "color temperature". A white color with a low color temperature appears to be reddish white. A white color with a high color temperature appears to have more blue in it.

## Setting a preferred color temperature

To set a preferred color temperature:

1. Highlight **Color Temperature** and select **Warm**, **Normal** or **Cool** by pressing ◀/▶ on the projector or remote control.
2. Press ▼ to highlight **Color Temperature Fine Tuning** and press **MODE/ENTER**. The **Color Temperature Fine Tuning** page displays.
3. Press ▲/▼ to highlight the item you want to change and adjust the values by pressing ◀/▶.
  - **R Gain/G Gain/B Gain**: Adjusts the contrast levels of Red, Green, and Blue.
  - **R Offset/G Offset/B Offset**: Adjusts the brightness levels of Red, Green, and Blue.
4. Press **MENU/EXIT** to exit and save the settings

## 3D Color Management

In most installation situations, color management will not be necessary, such as in classroom, meeting room, or lounge room situations where lights remain on, or where building external windows allow daylight into the room.

Only in permanent installations with controlled lighting levels such as boardrooms, lecture theaters, or home theaters, should color management be considered. Color management provides fine color control adjustment to allow for more accurate color reproduction, should you require it.

Proper color management can only be achieved under controlled and reproducible viewing conditions. You will need to use a colorimeter (color light meter), and provide a set of suitable source images to measure color reproduction. These tools are not provided with the projector, however, your projector supplier should be able to provide you with suitable guidance, or even an experienced professional installer.

The Color Management provides six sets (RGBCMY) of colors to be adjusted. When you select each color, you can independently adjust its range and saturation according to your preference.

If you have purchased a test disc which contains various color test patterns and can be used to test the color presentation on monitors, TVs, projectors, etc, you can project any image from the disc on the screen and enter the **3D Color Management** menu to make adjustments.

To adjust the settings:

1. Go to the **PICTURE** menu and highlight **3D Color Management**.
2. Press **MODE/ENTER** on the projector or remote control and the **3D Color Management** page displays.
3. Highlight **Primary Color** and press ◀/▶ to select a color from among Red, Yellow, Green, Cyan, Blue, or Magenta.
4. Press ▼ to highlight **Hue** and press ◀/▶ to select its range. Increase in the range will include colors consisted of more proportions of its two adjacent colors.

Please refer to the illustration to the right for how the colors relate to each other. For example, if you select Red and set its range at 0, only pure red in the projected picture will be selected. Increasing its range will include red close to yellow and red close to magenta.

5. Press ▼ to highlight **Saturation** and adjust its values to your preference by pressing ◀/▶. Every adjustment made will reflect to the image immediately.

For example, if you select Red and set its value at 0, only the saturation of pure red will be affected.

☞ **Saturation** is the amount of that color in a video picture. Lower settings produce less saturated colors; a setting of “0” removes that color from the image entirely. If the saturation is too high, that color will be overpowering and unrealistic.

6. Press ▼ to highlight **Gain** and adjust its values to your preference by pressing ◀/▶. The contrast level of the primary color you select will be affected. Every adjustment made will reflect to the image immediately.
7. Repeat steps 3 to 6 for other color adjustments.
8. Make sure you have made all of the desired adjustments.
9. Press **MENU/EXIT** to exit and save the settings.

### Resetting current or all picture modes

1. Go to the **PICTURE** menu and highlight **Reset Picture Settings**.
2. Press **MODE/ENTER** and press ▲/▼ to select **Current** or **All**.
  - **Current**: returns current picture mode to the factory preset settings.
  - **All**: returns all settings, except **User 1/User 2** in the **PICTURE** menu to the factory preset settings.

## Setting the presentation timer

Presentation timer can indicate the presentation time on the screen to help you achieve better time management when giving presentations. Follow these steps to utilize this function:

1. Go to the **SYSTEM SETUP: Basic > Presentation Timer** menu and press **MODE/ENTER** to display the **Presentation Timer** page.
2. Highlight **Timer Period** and decide the time period by pressing ◀/▶. The length of time can be set from 1 to 5 minutes in 1-minute increments and 5 to 240 minutes in 5-minute increments.

☞ If the timer is already on, the timer will restart whenever the Timer Period is reset.

3. Press ▼ to highlight **Timer Display** and choose if you want the timer to show up on the screen by pressing ◀/▶.

Selection	Description
Always	Displays the timer on screen throughout the presentation time.
3 min/2 min/1 min	Displays the timer on screen in the last 3/2/1 minute(s).
Never	Hides the timer throughout the presentation time.

- Press ▼ to highlight **Timer Position** and set the timer position by pressing ◀/▶.

Top-Left → Bottom-Left → Top-Right → Bottom-Right
---

- Press ▼ to highlight **Timer Counting Direction** and select your desired counting direction by pressing ◀/▶.

Selection	Description
Count Up	Increases from 0 to the preset time.
Count Down	Decreases from the preset time to 0.

- Press ▼ to highlight **Sound Reminder** and decide if you want to activate sound reminder by pressing ◀/▶. If you select **On**, a double beep sound will be heard at the last 30 seconds of counting down/up, and a triple beep sound will be produced when the timer is up.
- To activate the presentation timer, press ▼ and press ◀/▶ to highlight **On** and press **MODE/ENTER**.
- A confirmation message displays. Highlight **Yes** and press **MODE/ENTER** on the projector or remote control to confirm. You will see the message “**Timer is On**” displaying on the screen. The timer starts counting when the timer is on.

To cancel the timer, perform the following steps:

- Go to the **SYSTEM SETUP: Basic > Presentation Timer** menu and highlight **Off**. Press **MODE/ENTER**. A confirmation message displays.
- Highlight **Yes** and press **MODE/ENTER** to confirm. You will see the message “**Timer is Off**” displaying on the screen.

## Remote paging operations

Connect the projector to your PC or notebook with a USB cable prior to using the paging function. See "[Connection](#)" on page 18 for details.

You can operate your display software program (on a connected PC) which responds to page up/down commands (like Microsoft PowerPoint) by pressing **PAGE+/PAGE-** or **Page Up/Page Down** on the remote control.

If remote paging function doesn't work, check if the USB connection is correctly made and the mouse driver on your computer is updated to the latest version.

 The remote paging function cannot work with Microsoft® Windows®98 operating system. Windows®XP or higher operating systems are recommended.

## Freezing the image

Press **FREEZE** on the remote control to freeze the image. The word “**FREEZE**” will display in the upper left corner of the screen. To release the function, press any key on the projector or remote control.

 If your remote control has the following keys, please note that they cannot be pressed to release the function: **LASER, PAGE+/PAGE-, Page Up/Page Down**.

Even if an image is frozen on the screen, the pictures are running on the video or other device. If the connected devices have active audio output, you will still hear the audio even though the image is frozen onscreen.

# Hiding the image

In order to draw the audience's full attention to the presenter, you can use **ECO BLANK** on the projector or remote control to hide the screen image. When this function is activated with an audio input connected, the audio can still be heard.

You can set the blank time in the **SYSTEM SETUP: Basic > Operation Settings > Blank Timer** menu to let the projector return the image automatically after a period of time when there is no action taken on the blank screen.

If the preset time spans are not suitable for your presentation, select **Disable**.

No matter **Blank Timer** is activated or not, you can press most of the keys on the projector or remote control to restore the picture.

 Do not block the projection lens from projecting as this could cause the blocking object to become heated and deformed or even cause a fire.

# Locking control keys

With the control keys on the projector locked, you can prevent your projector settings from being changed accidentally (by children, for example). When the **Panel Key Lock** is on, no control keys on the projector will operate except  **POWER**.

1. Go to the **SYSTEM SETUP: Basic > Panel Key Lock** menu, and select **On** by pressing  /  on the projector or remote control. A confirmation message displays.
2. Highlight **Yes** and press **MODE/ENTER** to confirm.

To release panel key lock, use the remote control to enter the **SYSTEM SETUP: Basic > Panel Key Lock** menu and press  /  to select **Off**.

-  • Keys on the remote control are still active when panel key lock is enabled.
- If you turn off the projector without disabling panel key lock, the projector will still be in locked status the next time it is turned on.

# Operating in a high altitude environment

We recommend you use the **High Altitude Mode** when your environment is between 1500 m–3000 m above sea level, and ambient temperature is between 0°C–30°C.

 Do not use the **High Altitude Mode** if your altitude is between 0 m and 1500 m and ambient temperature is between 0°C and 35°C. The projector will be over cooled, if you turn the mode on under such a condition.

To activate the **High Altitude Mode**:

1. Press **MENU/EXIT** and then press  /  until the **SYSTEM SETUP: Advanced** menu is highlighted.
2. Press  to highlight **High Altitude Mode** and press  /  select **On**. A confirmation message displays.
3. Highlight **Yes** and press **MODE/ENTER**.

Operation under "**High Altitude Mode**" may cause a higher decibel operating noise level because of increased fan speed necessary to improve overall system cooling and performance.

If you use this projector under other extreme conditions excluding the above, it may display auto shut-down symptoms, which is designed to protect your projector from over-heating. In cases like this, you should switch to High Altitude mode to solve these

symptoms. However, this is not to state that this projector can operate under any and all harsh or extreme conditions.

## Adjusting the sound

The sound adjustments made as below will have an effect on the projector speaker(s). Be sure you have made a correct connection to the projector audio input. See "[Connection](#)" on page 18 for how the audio input is connected.

### Muting the sound

To temporarily turn off the sound:

1. Press **MENU/EXIT** and then press ◀/▶ until the **SYSTEM SETUP: Advanced** menu is highlighted.
2. Press ▼ to highlight **Audio Settings** and press **MODE/ENTER**. The **Audio Settings** page displays.
3. Highlight **Mute** and press ◀/▶ to select **On**.

☞ If available, you can also press **MUTE** on the remote control to toggle projector audio between on and off.

### Adjusting the sound level

To adjust the sound level, press **🔊 / 🔊**), or:

1. Repeat steps 1-2 above.
2. Press ▼ to highlight **Volume** and press ◀/▶ to select a desired sound level.

### Turning off the Power On/Off Ring Tone

To turn off the ring tone:

1. Repeat steps 1-2 above.
2. Press ▼ to highlight **Power On/Off Ring Tone** and press ◀/▶ to select **Off**.

☞ The only way to change **Power On/Off Ring Tone** is setting On or Off here. Setting the sound mute or changing the sound level will not affect the **Power On/Off Ring Tone**.

## Using the test pattern

The projector is able to display the grid test pattern. It helps you adjust the image size and focus and check that the projected image is free from distortion.

To display the test pattern, open the OSD menu and go to the **SYSTEM SETUP: Advanced > Test Pattern** and press ◀/▶ to select **On**.

# Using the teaching templates

The projector provides several preset patterns for various teaching purposes. To activate the pattern:

1. Open the OSD menu and go to the **DISPLAY > Teaching Template** and press **▲/ ▼** to select **Blackboard** or **Whiteboard**.
2. Press **◀/▶** to choose the pattern you need.
3. Press **MODE/ENTER** to activate the pattern.

Teaching Template	Whiteboard	Blackboard
<b>Letter Formation</b>		
<b>Worksheet</b>		
<b>Coordinate Chart</b>		

# Presenting from a USB Reader

This feature allows you to browse the image and document files stored on a USB flash drive connected to the projector. It can eliminate the need for a computer source.

## Supported file formats:

- JPEG(JPG)
- PNG
- TIFF
- BMP
- GIF

-  • A square box will display on the filename for unidentified characters.
  - Thai filename is not supported.
  - Files in GIF, TIFF, PNG and BMP formats can be displayed for the file size smaller than WXGA (1280 x 800) only.
  - If a folder consists of more than 200 files, only the first 200 files can be displayed.
1. Plug the USB flash drive into the USB TYPE-A jack of the projector.
  2. The projector automatically displays the detected USB flash drive. Or you can manually select **USB Reader** from the source selection bar.
  3. Found USB disc icon(s) will appear on the lower-left corner. Press **▲/▼/◀/▶** to select the desired disc drive and press **MODE/ENTER**.
  4. Thumbnails of the files stored on the USB flash drive will display.

## When viewing thumbnails

To	Press
scroll through thumbnails	<b>▲/▼/◀/▶</b>
open the folder or view an image/ document file in full screen	<b>MODE/ENTER</b>
return to an upper directory	<b>MODE/ENTER</b> when the Back icon is selected
change to a different page	<b>◀/▶</b>

5. To exit full screen mode, press **MODE/ENTER**.

# Shutting down the projector

1. Press **POWER** or **OFF** and a confirmation message will display prompting you.  
If you don't respond in a few seconds, the message will disappear.
2. Press **POWER** or **OFF** a second time. The **POWER indicator light** flashes orange, the projection lamp shuts down, and the fans will continue to run for approximately 90 seconds to cool down the projector.

To protect the lamp, the projector will not respond to any commands during the cooling process.

To shorten the cooling time, you can also activate the Quick cooling function. See "[Quick Cooling](#)" on page 49 for details.

3. Once the cooling process finishes, a "**Power Off Ring Tone**" will be heard. The **POWER indicator light** is a steady orange and fans stop. Disconnect the power cord from the power outlet.

- To turn off the power ring tone, see "[Turning off the Power On/Off Ring Tone](#)" on page 38 for details.
- If the projector is not properly shut down, to protect the lamp, when you attempt to re-start the projector, the fans will run for a few minutes to cool down. Press **POWER** or **ON** again to start the projector after the fans stop and the **POWER indicator light** turns orange.
- Lamp life results will vary depending on environmental conditions and usage.

## Direct power off

The AC power cord can be pulled out right after the projector is turned off. To protect the lamp, wait about 10 minutes before re-starting the projector. (When you attempt to re-start the projector, the fans may run for a few minutes to cool down. In such cases, press **POWER** or **ON** again to start the projector after the fans stop and the **POWER indicator light** turns orange.

# Menu operation

## Menu system

Please note that the on-screen display (OSD) menus vary according to the signal type selected and the projector model you are using.

Note that the menu items are available when the projector detects at least one valid signal. If there is no equipment connected to the projector or no signal detected, limited menu items are accessible.

## Description of each menu

Function	Description
<b>I. DISPLAY menu</b>	<b>Wall Color</b> Corrects the projected picture's color when the projection surface is not white. See <a href="#">"Using Wall Color" on page 32</a> for details.
	<b>Aspect Ratio</b> There are several options to set the image's aspect ratio depending on your input signal source. See <a href="#">"Selecting the aspect ratio" on page 29</a> for details.
	<b>2D Keystone</b> Corrects any keystone of the image. See <a href="#">"Correcting keystone" on page 22</a> for details.
	<b>Corner Fit</b> See <a href="#">"Adjusting Corner Fit" on page 23</a> for details.
	<b>Surface Fit</b> See <a href="#">"Adjusting surface fit" on page 24</a> for details.
	<b>Position</b> Displays the position adjustment page. To move the projected image, use the directional arrow keys. The values shown on the lower position of the page change with every key press you made until they reach their maximum or minimum.   This function is only available when a PC signal (analog RGB) is selected.
	<b>Phase</b> Adjusts the clock phase to reduce image distortion.   This function is only available when a PC signal (analog RGB) is selected. 
	<b>H. Size</b> Adjusts the horizontal width of the image.   This function is only available when a PC signal (analog RGB) is selected.
<b>Digital Zoom</b> Magnifies or reduces the projected image. See <a href="#">"Magnifying and searching for details" on page 29</a> for details.	

Function	Description
<p style="writing-mode: vertical-rl; transform: rotate(180deg);">I. DISPLAY menu</p> <p style="text-align: center; font-weight: bold;">3D</p>	<p>This projector features a 3D function which enables you to enjoy the 3D movies, videos, and sporting events in a more realistic way by presenting the depth of the images. You need to wear a pair of 3D glasses to view the 3D images.</p> <p><b>3D Mode</b></p> <p>The default setting is <b>Auto</b> and the projector automatically chooses an appropriate 3D format when detecting 3D contents. Once applied, the projector will automatically play the incoming 3D contents if it matches the 3D settings saved.</p> <p> Only the set(s) of 3D settings with memorized data is available.</p>
<p><b>Teaching Template</b></p>	<p>See "<a href="#">Using the teaching templates</a>" on page 39 for details.</p>

	Function	Description
2. PICTURE menu	<b>Picture Mode</b>	Pre-defined picture modes are provided so you can optimize your projector image set-up to suit your program type. See <a href="#">"Selecting a picture mode" on page 32</a> for details.
	<b>Reference Mode</b>	Selects a picture mode that best suits your need for the image quality and further fine-tune the image based on the selections listed on the same page below. See <a href="#">"Setting the User 1/User 2 mode" on page 32</a> for details.
	<b>Brightness</b>	Adjusts the brightness of the image. See <a href="#">"Adjusting Brightness" on page 33</a> for details.
	<b>Contrast</b>	Adjusts the degree of difference between dark and light in the image. See <a href="#">"Adjusting Contrast" on page 33</a> for details.
	<b>Color</b>	Adjusts the color saturation level -- the amount of each color in a video image. See <a href="#">"Adjusting Color" on page 33</a> for details.  This function is only available when a Video, S-Video or Component Video signal is selected.
	<b>Tint</b>	Adjusts the red and green color tones of the image. See <a href="#">"Adjusting Tint" on page 33</a> for details.  This function is only available when a Video or S-Video signal is selected.
	<b>Sharpness</b>	Adjusts the image to make it look sharper or softer. See <a href="#">"Adjusting Sharpness" on page 33</a> for details.  This function is only available when a Video, S-Video or Component Video signal is selected.
	<b>Brilliant Color</b>	See <a href="#">"Adjusting Brilliant Color" on page 33</a> for details.
	<b>Color Temperature</b>	See <a href="#">"Selecting a color temperature" on page 33</a> for details.
	<b>Color Temperature Fine Tuning</b>	See <a href="#">"Setting a preferred color temperature" on page 34</a> for details.
	<b>3D Color Management</b>	See <a href="#">"3D Color Management" on page 34</a> for details.
<b>Reset Picture Settings</b>	See <a href="#">"Resetting current or all picture modes" on page 35</a> for details.	
3. SOURCE menu	<b>Quick Auto Search</b>	See <a href="#">"Switching input signal" on page 28</a> for details.
	<b>Color Space Conversion</b>	See <a href="#">"Changing Color Space" on page 29</a> for details.

Function	Description
<b>Presentation Timer</b>	Reminds the presenter to finish the presentation within a certain time frame. See <a href="#">"Setting the presentation timer" on page 35</a> for details.
<b>Language</b>	Sets the language for the On-Screen Display (OSD) menus. See <a href="#">"Using the menus" on page 25</a> for details.
<b>Projector Installation</b>	The projector can be installed on a ceiling or behind a screen, or with one or more mirrors. See <a href="#">"Using the quick install" on page 14</a> for details.
<b>Menu Settings</b>	<p><b>Menu Display Time</b> Sets the length of time the OSD will remain active after your last key press.</p> <p><b>Menu Position</b> Sets the On-Screen Display (OSD) menu position.</p> <p><b>Reminder Message</b> Sets the reminder messages on or off.</p>
<b>Operation Settings</b>	<p><b>Direct Power On</b> Allows the projector to turn on automatically once the power is fed through the power cord.</p> <p><b>Signal Power On</b> Sets whether to turn the projector directly on without pressing <b>POWER</b> or <b>ON</b> when the projector is in standby mode and detects a VGA signal or a HDMI signal with 5V power.</p> <p><b>Auto Power Off</b> Allows the projector to turn off automatically if no input signal is detected after a set period of time. See <a href="#">"Setting Auto Power Off" on page 54</a> for details.</p> <p><b>Quick Cooling</b> Enables or disables the Quick Cooling function. Selecting <b>On</b> enables the function and projector cooling time will be shortened from a normal 90-second duration to approximately 15 seconds.</p> <p> This function is only available when <b>Instant Restart</b> is off.</p> <p><b>Instant Restart</b> Selecting <b>On</b> enables you to restart the projector immediately within 90 seconds after turning it off.</p> <p><b>Blank Timer</b> Sets the image blank time when the Blank feature is activated, once elapsed the image will return to the screen. See <a href="#">"Hiding the image" on page 37</a> for details.</p> <p><b>Sleep Timer</b> Sets the auto-shutdown timer.</p>

	Function	Description
<b>4. SYSTEM SETUP: Basic menu</b>	<b>Panel Key Lock</b>	Disables or enables all panel key functions except <b>POWER</b> on the projector and keys on the remote control. See <a href="#">"Locking control keys" on page 37</a> for details.
	<b>Background Color</b>	Sets the background color for the projector.
	<b>Splash Screen</b>	Allows you to select which logo screen will display during projector start-up.
	<b>PointWrite Touch Module</b>	Disables or enables "Type A connector" 5V power output for PointWrite Touch Module.
<b>5. SYSTEM SETUP: Advanced menu</b>	<b>High Altitude Mode</b>	A mode for operation in high altitude areas. See <a href="#">"Operating in a high altitude environment" on page 37</a> for details.
	<b>Audio Settings</b>	See <a href="#">"Adjusting the sound" on page 38</a> for details.
	<b>Lamp Settings</b>	<p><b>Lamp Mode</b> See <a href="#">"Setting the Lamp Mode" on page 54</a> for details.</p> <p><b>Reset Lamp Timer</b> See <a href="#">"Resetting the lamp timer" on page 58</a> for details.</p> <p><b>Lamp Timer</b> See <a href="#">"Getting to know the lamp hour" on page 54</a> for details on how the total lamp hour is calculated.</p>
	<b>Security Settings</b>	See <a href="#">"Utilizing the password function" on page 26</a> for details.

Function	Description
<b>Baud Rate</b>	Selects a baud rate that is identical with your computer's so that you can connect the projector using a suitable RS-232 cable and update or download the projector's firmware. This function is intended for qualified service personnel.
<b>Test Pattern</b>	See <a href="#">"Using the test pattern" on page 38</a> for details.
<b>Closed Caption</b>	<p><b>Closed Caption Enable</b> Activates the function by selecting <b>On</b> when the selected input signal carries closed captions.</p> <ul style="list-style-type: none"> <li>• Captions: An on-screen display of the dialogue, narration, and sound effects of TV programs and videos that are closed captioned (usually marked as "CC" in TV listings).</li> </ul> <p><b>Caption Version</b> Selects a preferred closed captioning mode. To view captions, select CCI, CC2, CC3, or CC4 (CCI displays captions in the primary language in your area).</p>
<b>Standby Settings</b>	<p><b>Network</b></p> <ul style="list-style-type: none"> <li>• <b>Enable Network Standby Mode</b> Selecting <b>On</b> enables the function. The projector is able to provide the network function in standby mode. Selecting <b>Off</b> disables the function. The projector does not provide the network function in standby mode.</li> <li>• <b>Auto Disable Network Standby Mode</b> Allows the projector to disable the network function after a set period of time after it enters standby mode. For instance, if 20 min is selected, the projector is able to provide the network function for 20 minutes after it enters standby mode. When 20 minutes is up, the projector enters normal standby mode.</li> </ul> <p> This function is only available when <b>Enable Network Standby Mode</b> is <b>On</b>.</p> <p><b>MHL Charging</b> Selecting <b>On</b> enables the function. The projector will automatically charge the connected MHL compatible smart device as long as the power is fed to the projector.</p> <p><b>Monitor Out</b> Selecting <b>On</b> enables the function. The projector can output a VGA signal when it is in standby mode and the <b>COMPUTER 1</b> jack is correctly connected to devices. See <a href="#">"Connection" on page 18</a> for how to make the connection.</p> <p><b>Audio Pass Through</b> The projector can play sound when it is in standby mode and the corresponding jacks are correctly connected to devices. Press ◀/▶ to choose the source that you wish to use. See <a href="#">"Connection" on page 18</a> for how to make the connection.</p> <p> Enabling this function slightly increases the standby power consumption.</p>

	Function	Description
<b>5. SYSTEM SETUP:</b> Advanced menu	<b>Network Settings</b>	See <a href="#">BenQ Network Projector Operation Guide</a> for details.
	<b>Reset All Settings</b>	Returns all settings to the factory preset values.   The following settings will still remain: <b>User 1, User 2, Color Space Conversion, Projector Installation, PointWrite Touch Module, High Altitude Mode, Security Settings, Baud Rate</b> and <b>Network Settings</b> .
<b>6. INFORMATION menu</b>	<b>Current System Status</b>	<b>Source</b> Shows the current signal source.  <b>Picture Mode</b> Shows the selected mode in the <b>PICTURE</b> menu.  <b>Lamp Mode</b> Shows the current lamp mode.  <b>Resolution</b> Shows the native resolution of the input signal.  <b>3D Format</b> Shows the current 3D mode.  <b>Color System</b> Shows input system format.  <b>Lamp Usage Time</b> Displays the number of hours the lamp has been used.  <b>Firmware Version</b> Shows the firmware version of your projector.

# Maintenance

## Care of the projector

Your projector needs little maintenance. The only thing you need to do on a regular basis is to keep the lens and case clean.

Never remove any parts of the projector except the lamp. Contact your dealer if other parts need replacing.

## Cleaning the lens

Clean the lens whenever you notice dirt or dust on the surface. Please be sure to turn off the projector and let it cool down completely before cleaning the lens.

- Use a canister of compressed air to remove dust.
- If there is dirt or smears, use lens-cleaning paper or moisten a soft cloth with lens cleaner and gently wipe the lens surface.
- Never use any type of abrasive pad, alkaline/acid cleaner, scouring powder, or volatile solvent, such as alcohol, benzene, thinner or insecticide. Using such materials or maintaining prolonged contact with rubber or vinyl materials may result in damage to the projector surface and cabinet material.

## Cleaning the projector case

Before you clean the case, turn the projector off using the proper shutdown procedure as described in ["Shutting down the projector" on page 41](#) and unplug the power cord.

- To remove dirt or dust, wipe the case with a soft, lint-free cloth.
- To remove stubborn dirt or stains, moisten a soft cloth with water and a neutral pH detergent. Then wipe the case.

 Never use wax, alcohol, benzene, thinner or other chemical detergents. These can damage the case.

## Storing the projector

If you need to store the projector for an extended time, please follow the instructions below:

- Make sure the temperature and humidity of the storage area are within the recommended range for the projector. Please refer to ["Specifications" on page 61](#) or consult your dealer about the range.
- Retract the adjuster feet.
- Remove the battery from the remote control.
- Pack the projector in its original packing or equivalent.

## Transporting the projector

It is recommended that you ship the projector with its original packing or equivalent.

# Lamp information

## Getting to know the lamp hour

When the projector is in operation, the duration (in hours) of lamp usage is automatically calculated by the built-in timer.

Total (equivalent) lamp hour = 2.4 × (hours used in **Normal** mode) + 1.5 × (hours used in **Economic** mode) + 1.0 × (hours used in **SmartEco** mode)

To obtain the lamp hour information:

1. Press **MENU/EXIT** and then press ◀/▶ to highlight the **SYSTEM SETUP: Advanced** menu.
2. Press ▼ to highlight **Lamp Settings** and press **MODE/ENTER**. The **Lamp Settings** page displays.
3. You will see the **Lamp Timer** information displaying on the menu.
4. To leave the menu, press **MENU/EXIT**.

You can also get the lamp hour information on the **INFORMATION** menu.

## Extending lamp life

The projection lamp is a consumable item that normally can last up to 3000-4000 hours with proper usage. To keep the lamp life as long as possible, you can do the following settings via the OSD menu.

- **Setting the Lamp Mode**

Setting the projector in **Economic** or **SmartEco** mode extends the lamp operation life. To do so, go into the **SYSTEM SETUP: Advanced > Lamp Settings > Lamp Mode** menu and press ◀/▶.

Lamp mode	Description
<b>Normal</b>	Provides full lamp brightness
<b>Economic</b>	Lowers brightness to extend the lamp life and decreases the fan noise
<b>SmartEco</b>	Adjusts the lamp power automatically depending on the content brightness level

- **Setting Auto Power Off**

This function allows the projector to turn off automatically if no input signal is detected after a set period of time to prevent unnecessary waste of lamp life.

To set **Auto Power Off**, go into the **SYSTEM SETUP: Basic > Operation Settings > Auto Power Off** menu and press ◀/▶. If the preset time lengths are not suitable for your presentation, select **Disable**. The projector will not automatically shut down in a certain time period.

## Timing of replacing the lamp

When the **Lamp indicator** lights up red or a message appears suggesting it is time to replace the lamp, please install a new lamp or consult your dealer. An old lamp may cause a malfunction in the projector and in some instances the lamp may explode.

Go to <http://www.BenQ.com> for a replacement lamp.

 The **LAMP indicator light** and **TEMPerature warning light** will light up if the lamp becomes too hot. Turn the power off and let the projector cool for 45 minutes. If the Lamp or Temp indicator still lights up after turning the power back on, please contact your dealer. See "[Indicators](#)" on page 59 for details.

The following Lamp warning displays will remind you to change the lamp.

Status	Message
<p>Install a new lamp for optimal performance. If the projector is normally run with <b>Economic</b> selected (See "<a href="#">Getting to know the lamp hour</a>" on page 54), you may continue to operate the projector until the next hour lamp warning appears.</p> <p>Press <b>MODE/ENTER</b> to dismiss the message.</p>	
<p>It is strongly recommended that you replace the lamp at this age. The lamp is a consumable item. The lamp brightness diminishes with use. This is normal lamp behavior. You can replace the lamp whenever you notice that the brightness level has significantly diminished.</p> <p>Press <b>MODE/ENTER</b> to dismiss the message.</p>	
<p>The lamp <b>MUST</b> be replaced before the projector will operate normally.</p> <p>Press <b>MODE/ENTER</b> to dismiss the message.</p>	

 The "XXXX" shown in the above messages are numbers that vary depending on different models.

# Replacing the lamp

- To reduce the risk of electrical shock, always turn the projector off and disconnect the power cord before changing the lamp.
- To reduce the risk of severe burns, allow the projector to cool for at least 45 minutes before replacing the lamp.
- To reduce the risk of injuries to fingers and damage to internal components, use caution when removing lamp glass that has shattered into sharp pieces.
- To reduce the risk of injuries to fingers and/or compromising image quality by touching the lens, do not touch the empty lamp compartment when the lamp is removed.
- This lamp contains mercury. Consult your local hazardous waste regulations to dispose of this lamp in a proper manner.
- To assure optimal performance from the projector, it is recommended that you purchase a qualified projector lamp for lamp replacement.
- If lamp replacement is performed while the projector is suspended upside-down from the ceiling, make sure that no one is underneath the lamp socket to avoid any possible injury or damage to the human eyes caused by fractured lamp.
- Ensure good ventilation when handling broken lamps. We recommend that you use respirators, safety glasses, goggles or face shield and wear protective clothing such as gloves.

1. Turn the power off and disconnect the projector from the power outlet. If the lamp is hot, avoid burns by waiting for approximately 45 minutes until the lamp has cooled.

2. Loosen the screw that secures the lamp cover on the side of the projector until the lamp cover loosens.

3. Remove the lamp cover from the projector.

- Do not turn the power on with the lamp cover removed.
- Do not insert your fingers between the lamp and the projector. The sharp edges inside the projector may cause injuries.

4. Loosen the screw(s) that secures the lamp.
5. Lift the handle so that it stands up.

6. Use the handle to slowly pull the lamp out of the projector.

- Pulling it too quickly may cause the lamp to break and scatter broken glass in the projector.
- Do not place the lamp in locations where water might splash on it, children can reach it, or near flammable materials.
- Do not insert your hands into the projector after the lamp is removed. If you touch the optical components inside, it could cause color unevenness and distortion of the projected images.

7. As shown in the figure, insert the new lamp. Align the lamp connector and 2 sharp points with the projector and push the lamp a bit into the locked position.

8. Tighten the screw(s) that secures the lamp.

9. Ensure the handle is fully laid flat and locked in place.

- Loose screw may cause a bad connection, which could result in malfunction.
- Do not over tighten the screw.

10. Replace the lamp cover on the projector.

11. Tighten the screw that secures the lamp cover.

- Loose screw may cause a bad connection, which could result in malfunction.
- Do not over tighten the screw.

12. Connect the power and restart the projector.

Do not turn the power on with the lamp cover removed.

## Resetting the lamp timer

13. After the startup logo, open the On-Screen Display (OSD) menu. Go to the **SYSTEM SETUP: Advanced > Lamp Settings** menu. Press **MODE/ENTER**. The **Lamp Settings** page displays. Highlight **Reset Lamp Timer**. A warning message displays asking if you want to reset the lamp timer. Highlight **Reset** and press **MODE/ENTER**. The lamp time will be reset to "0".

Do not reset if the lamp is not new or replaced as this could cause damage.

# Indicators

Light			Status & Description
POWER 	TEMP 	LAMP 	
<b>Power events</b>			
<b>Orange</b>	<b>Off</b>	<b>Off</b>	Stand-by mode

# Troubleshooting

## ① The projector does not turn on.

Cause	Remedy
There is no power from the power cord.	Plug the power cord into the AC power jack on the projector, and plug the power cord into the power outlet. If the power outlet has a switch, make sure that it is switched on.
Attempting to turn the projector on again during the cooling process.	Wait until the cooling down process has completed.

## ① No picture

Cause	Remedy
The video source is not turned on or connected correctly.	Turn the video source on and check that the signal cable is connected correctly.
The projector is not correctly connected to the input signal device.	Check the connection.
The input signal has not been correctly selected.	Select the correct input signal with the <b>SOURCE</b> key on the projector or remote control.
The lens cover is still closed.	Open the lens cover.

## ① Blurred image

Cause	Remedy
The projection lens is not correctly focused.	Adjust the focus of the lens using the focus ring.
The projector and the screen are not aligned properly.	Adjust the projection angle and direction as well as the height of the projector if necessary.
The lens cover is still closed.	Open the lens cover.

## ① Remote control does not work

Cause	Remedy
The battery is out of power.	Replace the battery with new ones.
There is an obstacle between the remote control and the projector.	Remove the obstacle.
You are too far away from the projector.	Stand within 8 meters (26 feet) of the projector.

## ① The password is incorrect

Cause	Remedy
You do not remember the password.	Please see " <a href="#">Entering the password recall procedure</a> " on page 27 for details.

# Specifications

## Projector specifications

 All specifications are subject to change without notice.

### Optical

#### Resolution

1024 x 768 XGA (MX882UST)  
1280 x 800 WXGA (MW883UST)

#### Display system

1-CHIP DMD

#### Lens

F = 2.4, f = 3.35 mm

#### Lamp

240 W lamp

### Electrical

#### Power supply

AC100–240V, 3.9 A, 50–60 Hz (Automatic)

#### Power consumption

410 W (Max); < 0.5 W (Standby);  
< 6 W (when the Network function in the  
Standby Settings is on)

### Mechanical

#### Weight

8 Kg (17.6 lbs) with projector mounting  
plate

### Output terminals

#### RGB output

D-Sub 15-pin (female) x 1

#### Speaker

(Stereo) 10 watt x 2

#### Audio signal output

PC audio jack x 1

### Control

#### USB

PointWrite (Type-B mini USB)  
(Optional for PointWrite kit)  
Type-A power supply 5V /1.5 A  
(Optional for PointWrite Touch module)

#### RS-232 serial control

9 pin x 1

#### LAN control

RJ45 x 1

#### IR receiver x 1

### Input terminals

#### Computer input

RGB input  
D-Sub 15-pin (female) x 2

#### Video signal input

S-VIDEO  
Mini DIN 4-pin port x 1  
VIDEO  
RCA jack x 1  
SD/HDTV signal input  
Analog - Component RCA jack x 3  
(through RGB input)  
Digital - HDMI x 1; HDMI/MHL x 1

#### Audio signal input

Audio in  
RCA audio jack (L/R) x 2  
PC audio jack x 1

#### USB port (Mini-B x 1)

### Environmental Requirements

#### Operating temperature

0°C–40°C at sea level

#### Operating relative humidity

10%–90% (without condensation)

#### Operating altitude

0–1499 m at 0°C–35°C  
1500–3000 m at 0°C–30°C (with  
High Altitude Mode on)

# Dimensions

Unit: mm

# Wall mount installation

Wall Mount screw: M4  
(Max L = 25 mm; Min L = 20 mm)

Unit: mm

# Timing chart

## Supported timing for PC input

Resolution	Mode	Vertical Frequency (Hz)	Horizontal Frequency (kHz)	Pixel Frequency (MHz)
640 x 480	VGA_60*	59.940	31.469	25.175

## Supported timing for MHL input

Timing	Resolution	Vertical Frequency (Hz)	Horizontal Frequency (kHz)	Pixel Frequency (MHz)
480i	720 (1440) x 480	59.94	15.73	27
480p	720 x 480	59.94	31.47	27
576i	720 (1440) x 576	50	15.63	27
576p	720 x 576	50	31.25	27
720/50p	1280 x 720	50	37.5	74.25
720/60p	1280 x 720	60	45.00	74.25
1080/50i	1920 x 1080	50	28.13	74.25
1080/60i	1920 x 1080	60	33.75	74.25
1080/24P	1920 x 1080	24	27	74.25
1080/25P	1920 x 1080	25	28.13	74.25
1080/30P	1920 x 1080	30	33.75	74.25

## Supported timing for Component-YPrPb input

Timing	Resolution	Vertical Frequency (Hz)	Horizontal Frequency (kHz)	Pixel Frequency (MHz)
480i*	720 x 480	59.94	15.73	13.5
480p*	720 x 480	59.94	31.47	27
576i	720 x 576	50	15.63	13.5
576p	720 x 576	50	31.25	27
720/50p	1280 x 720	50	37.5	74.25
720/60p*	1280 x 720	60	45.00	74.25
1080/50i	1920 x 1080	50	28.13	74.25
1080/60i	1920 x 1080	60	33.75	74.25
1080/24P	1920 x 1080	24	27	74.25
1080/25P	1920 x 1080	25	28.13	74.25
1080/30P	1920 x 1080	30	33.75	74.25
1080/50P	1920 x 1080	50	56.25	148.5
1080/60P	1920 x 1080	60	67.5	148.5

- \*Supported timing for 3D signal in **Frame Sequential** format.
- Displaying a 1080i(1125i)@60Hz or 1080i(1125i)@50Hz signal may result in slight image vibration.

## Supported timing for Video and S-Video inputs

Video mode	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Color sub-carrier Frequency (MHz)
NTSC*	15.73	60	3.58
PAL	15.63	50	4.43
SECAM	15.63	50	4.25 or 4.41
PAL-M	15.73	60	3.58
PAL-N	15.63	50	3.58
PAL-60	15.73	60	4.43
NTSC4.43	15.73	60	4.43

- \*Supported timing for 3D signal in **Frame Sequential** format.

# Warranty and Copyright information

## Limited warranty

BenQ warrants this product against any defects in material and workmanship, under normal usage and storage.

Proof of purchase date will be required with any warranty claim. In the event this product is found to be defective within the warranty period, BenQ's only obligation and your exclusive remedy shall be replacement of any defective parts (labor included). To obtain warranty service, immediately notify the dealer from which you purchased the product of any defects.

Important: The above warranty shall be void if the customer fails to operate the product in accordance with BenQ's written instructions, especially the ambient humidity must be in-between 10% and 90%, temperature in-between 0°C and 35°C, altitude lower than 4920 feet, and avoiding to operate the projector in a dusty environment. This warranty gives you specific legal rights, and you may have other rights which vary from country to country.

For other information, please visit [www.BenQ.com](http://www.BenQ.com).

## Copyright

Copyright 2015 by BenQ Corporation. All rights reserved. No part of this publication may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language or computer language, in any form or by any means, electronic, mechanical, magnetic, optical, chemical, manual or otherwise, without the prior written permission of BenQ Corporation.

## Disclaimer

BenQ Corporation makes no representations or warranties, either expressed or implied, with respect to the contents hereof and specifically disclaims any warranties, merchantability or fitness for any particular purpose. Further, BenQ Corporation reserves the right to revise this publication and to make changes from time to time in the contents hereof without obligation to notify any person of such revision or changes.
